PWS ID: **00842** — STANFIELD, CITY OF

Alerts indicate water quality tests with analytical results greater than the detection limit or one-half of the maximum allowable contaminant level which may require some follow-up actions by the Drinking Water Services. See the [Contacts](#) link for reports on follow-up actions. Alerts are not water quality violations. Violations for this water system can be found [here](#).

TCR: 5 Temporary Routine sample(s) per Month to be taken 07/01/2002 - 07/31/2002 at DIST-A

TCR: 3 Repeat sample(s) within 24 hours of a TC+ Routine Sample to be reported 06/27/2002 - 07/10/2002 at DIST-A

TCR: 2 Routine sample(s) per Month to be taken 01/01/1991 - 06/30/2002 at DIST-A

Instructions and Notes

- 1) If no prior sample schedules appear, then no prior schedules exist within the database.
- 2) Schedules for water systems classified as "NP" (State Regulated) may not appear. If the system is active, samples must be collected for the presence of coliform bacteria once per month or once per quarter depending on water type, seasonal operating cycle, or previous sampling results.
- 3) If a sample tests positive for total coliform or *E. coli*, a minimum of 3 repeat samples must be collected. At water systems where quarterly monitoring takes place, 3 routine samples must be collected the month following one in which a routine sample tested positive for the presence of total coliform or *E. coli*.

Any time a sample tests positive for the presence of coliform bacteria, the system's operator should contact their regulator. For this water system, that is: Bill Goss/Amy Word, (541) 276-8006.

A blank or a 0 in the MCL column indicates that a MCL has not been set for that chemical

This list represents the latest test results for all sources and entry points the system has. For systems with multiple sources the list will probably be a mix of results from all sources. But these are the latest results.

Entry Point Chemical Detection Summary PWS ID: [00842](#) — STANFIELD, CITY OF

These entry point concentrations are greater than non-detect and do not necessarily exceed an action level, MCL, or other threshold.

Links to sample results for specific contaminants in the distribution system, can be found [here](#).
