Robin Scholetzky, AICP

Oregon Transportation & Growth Management (TGM) Program

This project is partially funded by a grant from the Transportation and Growth Management (TGM) Program, a joint program of the Oregon Department of Transportation and the Oregon Department of Land Conservation and Development. This TGM grant is financed, in part, by federal Transportation Equity Act for the 21st Century (TEA-21), local government, and the State of Oregon funds.

The contents of this document do not necessarily reflect views or policies of the State of Oregon.

The code revisions in this document were produced using the *Model Development Code and User's Guide for Small Cities* which was developed by the Transportation and Growth Management Program, sponsored by the Oregon Department of Transportation (ODOT) and the Oregon Department of Land Conservation and Development (DLCD). The format, structure, and code concepts presented in the *Model Development Code* emphasizes and encourages the following “Smart Development” principles:

- Using land and resources efficiently,
- Fully utilizing urban services,
- Allowing for a mix of uses,
- Providing for a range of transportation choices, and
- Designing development to the scale and comfort of people.

City of Stanfield Development Code

Table of Contents
